

## Our Philosophy

We believe that every person with vision loss should have the opportunity to live a rich, vibrant and independent life.

## Some Of Our Patients' Everyday Challenges

- Reading labels, books and menus
- Keeping track of medicines
- Watching TV
- Seeing signs
- Writing checks and paying bills
- Making a phone call
- Looking at family photos

## What Our Patients Say About Us

I thought I didn't need "another doctor", but I learned new options to manage my vision loss. I am so happy I made an appointment.

- Mark L.

Thank you! I didn't know I could still do so many things on my own. - Marie S.

The electronic magnifier my mother got through your clinic helps her stay involved with the world and keeps her brain sharp.

- Jane F.

## Low Vision Clinic

## Practical Solutions for Everyday Challenges

Offering expertise, options and hope to people with permanent vision loss since 2006

## Evaluation

An evaluation by a Low Vision Optometrist goes beyond a standard eye examination. Our doctors take the time to understand the daily challenges caused by your vision loss, help identify your personal goals and offer practical solutions that can be used in everyday life.

## Aids and Devices

Our doctors may recommend low vision devices and daily living aids to help you perform everyday tasks more easily and with less frustration. We offer a wide selection of tools to meet your specific needs.

## Training and Techniques

Our Occupational Therapist / LVT assists you with problem solving. She provides one on one training in the use of devices, teaches adaptive techniques and offers individualized coping strategies for adjustment to vision loss.

# Our Team

**Denise T. Wilcox, O.D., Ph.D.**

Low Vision Services  
Coordinator

## Technology Room

Our experienced clinicians work with you in a state of the art technology room. With their help, you can try the latest products and become comfortable with their use before deciding what works best for you.

## Lending Library

Patients with limited resources have the option to borrow recommended devices from our loaner program inventory. We will help you develop a plan for the purchase of the device after the maximum one year loan period ends.

## Resource Assistance

The Low Vision Clinic accepts most insurances for evaluations and training. No one is refused service due to an inability to pay. Financial assistance may be available to access our services.

## Eyeglasses

Can't afford your prescription eyeglasses? We may be able to help. Our community partners offer programs that provide basic and specialized glasses at no cost for people who meet the eligibility requirements.
